## **USA PhoneCenters Selected by NEW JERSEY League of MUNICIPALITIES To Provide NEW Facility with Siemens HiPath® 3000 Business Phone and Voicemail System**

The New Jersey League of Municipalities wanted to outfit their new building with a state-of-the-art digital communications phone system, able to operate as a multimode real-time IP system with the ability to support traditional interfaces and features.

The League is a voluntary association created to help communities do a better job of self-government through pooling information resources and brain power. Since 1915, has been serving local officials throughout the Garden State. All 566 municipalities are members of the League. Over 560 mayors and 13,000 elected and appointed officials of member municipalities are entitled to all of the services and privileges of the League.

The League's decision was made to purchase Siemens equipment, through USA PhoneCenters, an Authorized Siemens Reseller, of Cherry Hill NJ for professional installation. After reviewing several systems, the solution became clear to select the Siemens HiPath 3000 Real-time IP System, designed for

small to medium sized businesses. The HiPath 3000 can be configured with up to 500 IP telephones, 384 digital phones or in a mixed configuration up to 500 telephones and soft clients.

The HiPath 3000 series starts with as little as five users (with built-in answer voicemail) and may easily migrate into larger configurations

with the HiPath 5000 Real-time IP system – able to network up to 32 survivable media gateways – as a single server supporting up to 1000 users!

“The Siemens HiPath 3000 system is a perfect solution for New Jersey League of Business, allowing for features and dependability that the League requires now, with the ability to grow in the future,” says

Greg Gutos GM for USA PhoneCenters. “Some of our competition offer traditional phone systems OR 100% IP. No need to worry – this system can handle both traditional telephones and IP phones. Down the road, the League might want to have remote workers or network in a 2nd site – all to operate as one. No problem. Siemens is the perfect solution for a small to medium size business that wants to be future ready. No wonder more than 70% of the world's Fortune 500 companies and more than 300 network operators worldwide turn to Siemens for know-how, solutions and long-standing financial stability.

“We would be happy to provide turn key proposals for any organization,” says Greg Gutos, General Manager, USA PhoneCenters “It's the perfect choice and solution!” ■
